

NeoStampa job checklist

One spot color job from Image Presto TIFF to printed and cut transfers. Values in teal are the ones used on the reference job; use your own sizes and counts. Full steps: Lumen S24F NeoStampa Print and Cut Guide.

- | | | |
|--------------------------|--|---|
| ☐ | 01 New document | Left toolbar, New Document . Document Type Garment . |
| ☐ | 02 Printer and scheme | For Printer: Lumen S24F . Scheme: Lumen S24F_TPU Film_ColorPrime Ink_720x1200 8Pass_260608 . Ok . |
| ☐ | 03 Import the TIFF | Import or drag and drop. Multi-Channel TIFF from Image Presto, channels named W1 W2 V1 V2 . |
| ☐ | 04 Size | Select the design, type the width on the top toolbar, proportion lock on (reference: 12.12 x 9.09 cm). |
| ☐ | 05 Mosaic | Properties, Mosaic, Copies . Width x Length (reference 6 x 3 = 18), Gap 0.0 mm . Apply . |

| ☐ | 07 Numeric job name
CUTTING | Rename the job tab to digits only, e.g. 20260908 . Letters give "The QR requires a numerical job name". |
| ☐ | 08 Contour Cut
CUTTING | Plotter: Arc 127 Cutter . Registration marks on, Page length 60.00 cm , Draw QR on. Apply . |
| ☐ | 09 Print | Print... , RIP Options: Process and Send simultaneously . Send over TCP/IP or tick Send to an output file (.prt). Print! . Watch the Job Queue. |
| ☐ | 10 Cut
CUTTING | Cut... , Contour cutting: tick Reverse cut and Enable Two-Pen Mode . Cut! writes the cut file (.plt). |

⚠ CAUTION

Never edit the Lumen print scheme. White and varnish ink mode must stay Off and the Color Replacement Table must stay "Lumen S24F Spot Color Preset", or white and varnish flood or vanish.

NOTE

Cutting: do steps 06 to 08 before you print, so the registration marks and QR code print with the job. Print-only jobs skip the four Cutting rows.
