

Lumen S24F

3D Embossed UV DTF Printer

Turn flat artwork into dimensional UV DTF prints through an AI-assisted, production-ready workflow.

Add Dimension to Your Prints.

AI-assisted 3D layering

Converts flat artwork into layered, dimensional designs faster with Image Presto. The result is multiple premium finish options that open the door to higher-value applications beyond flat prints.

Dual Epson printheads

Powers reliable, production-ready output for commercial runs. Paired printheads (i1600-UIHD + i3200-UIHD) keep detail sharp even as jobs scale up.

Built-in fume extractor

Keeps fume management simple with integrated filtration, so shops don't need a separate extraction unit.

Automated ink circulation & cleaning

White ink circulation and auto-cleaning simplify daily operation. Less manual upkeep means more consistent output run after run.

Compact commercial footprint

Adds commercial-grade capability without needing oversized floor space. A practical fit for shops scaling into UV DTF without a warehouse-sized layout.

Support & Warranty

- **Lifetime** DTF Station tech support
- **1-year limited warranty** on non-consumable parts
- **neoStampa RIP, Image Presto** included
- 2-in-1 print and laminate, no separate laminator

Twenty-Four Inches Of Texture.

Texture you can feel.

AI-assisted layering turns flat artwork into raised, dimensional designs, opening up multiple premium finishes that standard flat-printed DTF transfers can't produce. It's a way to sell more than just flat prints.

Built for commercial production.

Dual Epson printheads (i1600-UIHD + i3200-UIHD) power reliable output, while white ink circulation and auto-cleaning keep daily operation simple. A built-in purifier manages fumes without extra equipment, so the whole job runs from one machine.

One workflow, start to finish.

Artwork, RIP, and printing connect in a single pipeline, adding commercial capability without needing oversized floor space. It's built to fit shops moving into UV DTF for the first time, not just established wide-format operations.

Support Every Step of the Way

Each machine comes with more than a warranty.
