

Miro 16

Shaker / Dryer

Mid-sized curing solution designed for **smooth, dependable production.**

Efficiency In Motion

17.7"

Film width

1,400_w

Power

Cures prints up to 17.7" (45 cm).

Sized to bridge the gap between an entry level shaker and a professional grade one.

Bottom and curved heating platens.

Even, consistently cured transfers, with the curved platen keeping media flowing through the cabin.

Touchscreen control panel.

Intuitive control that an operator can learn in a shift rather than a week.

Built-in filtration.

Powder and fumes stay inside the machine, so no ventilation ducting is needed.

Low power, standard outlet.

1,400W on 110V. No special electrical setup required.

Works with

- Prestige L2
- Any other DTF printer up to 17.7"

Dealer Locator

The Bridge Between Entry and Pro.

Between entry level and professional.

The Miro 16 exists for the shop that has outgrown a 13" shaker but is not running a 24" line yet. It cures prints up to 17.7" (45 cm), which pairs naturally with a Prestige L2.

Even curing, simple control.

Bottom and curved heating platens give consistent results across the full sheet, and a touchscreen control panel keeps day to day operation straightforward.

Still a 110V machine.

At 1,400W on standard 110V, the Miro 16 installs without an electrician. That is unusual at this width and it is the main practical reason to choose it.

Install & Facility

Dimensions (W x D x H)	34" x 62" x 40"
Machine Weight	185 lb (84 kg)
Power Supply	110 V
Rated Current	12.7 A
Power Consumption	1,400 W
